To Whom it may concern,

My husband & I have agreed on writing this letter in the hope that it may prevent someone going through the experience we suffered in May 73.

In July 1970 we were told by our doctor that we were going to have a baby. I rang the Mater Hospital to make a booking for the birth & I was told to go there for my first check up in October. On my first visit I was told by the Matron to start taking Fluoride tablets for the benefit of the baby.

I did so until 20th February 1971 when our first
